SUMMARY

Final-year Software Engineering student (BS SE, UMT Jun 2026) with demonstrated ability to architect and ship full-stack applications, design machine learning pipelines, and lead system architecture across real client and academic projects. Independently delivered multiple freelance web applications and led a 3-backend job portal as system architect, while completing a production grade AI dermatology platform as a final year capstone. Brings a consistent combination of frontend precision, backend depth, and applied ML expertise equally capable across MERN, Django environments.

EXPERIENCE

ME. AI-Powered Skin & Scalp Treatment System Final Year Project • 2025-2026

React • Django • PostgreSQL • EfficientNet-B4 • U-Net • YOLOv8 • XGBoost • LLM

- Architected an end-to-end personalised dermatology platform analysing user images and medical history to generate adaptive treatment plans achieving above 90% classification accuracy across skin and scalp conditions.
- Engineered a 5-stage vision pipeline (MediaPipe → EfficientNet-B4 → U-Net → YOLOv8 → XGBoost) with an LLM output layer; React frontend, Django REST API, and MySQL backend with longitudinal history tracking.

Multi-Backend Job Portal Team Lead & System Architect • 2024

React / TypeScript • Node.js / Express • Flask • PostgreSQL

- Led architecture across 3 independent backends (Node.js, Flask, shared React/TypeScript frontend) serving 3 user roles: Employer (job posting), JobSeeker (applications), Admin (platform control). Implemented CV parsing, multi-role RBAC, real-time messaging, and JWT auth across all backends.

Olympics Data Analysis & Prediction Dashboard Academic • 2024

Flask • Scikit-learn • Pandas • Chart.js • PostgreSQL

- Role-gated analytics platform (3 access tiers) with Random Forest, SVM, and Logistic Regression medal prediction across 120 years of Olympic data.

Sellerova . Amazon Catalog Management System Freelance • 2026

Next.js • React • Tailwind CSS • Node.js • Nodemailer • Hostinger Reach

- Full-stack agency website for Sellerova offering Amazon PPC management, catalog optimization, and performance-driven growth strategies, featuring a contact form with email delivery, newsletter subscription, and Google Analytics integration.

ToolsVera . Free Online Utilities Platform (toolsvera.com) Freelance • 2026

Python • Django • Tailwind CSS • JavaScript • Quill.js • PDF.js • ReportLab • PyMuPDF

- Built and deployed ToolsVera (toolsvera.com), a production multi-tool platform offering 70+ free online utilities — calculators, PDF tools (including a Word-style PDF editor), image and text tools — with SEO-optimized architecture and serverless infrastructure.

Freelance Full-Stack Web Applications 6 Projects • 2025 – present

React • Node.js • MongoDB • Django • AI/ML

- Six shipped client products: e-commerce (Stripe), real-time chat (Socket.io), logistics dashboard, inventory manager, scheduling SaaS, and headless CMS with SEO optimisation.

SKILLS

Frontend	React, TypeScript, Tailwind CSS, Bootstrap, HTML5, CSS3
Backend	Node.js, Express, Django, DRF, Flask, REST APIs
Databases	MySQL, PostgreSQL, MongoDB, SQLite
Computer Vision	YOLOv8, U-Net, EfficientNet-B4, MediaPipe, OpenCV, CNNs
NLP & LLMs	spaCy, Hugging Face, LLM API Integration, Text Classification
Deep Learning	Back-propagation, Batch Normalisation, Dropout, Regularisation, Data Augmentation
Classic ML	Scikit-learn, XGBoost, Pandas, NumPy, Matplotlib, Seaborn
Practices	Agile, Scrum, Git, SDLC, SPM, SQE, Code Review, Unit Testing

CERTIFICATIONS & EDUCATION

- IBM • Introduction to Computer Vision and Image Processing • Oct 2025
- Board Infinity • ML & Deep Learning for Software Engineers Specialization • Oct 2025
- Coursera • Full Stack Web Developer • Mar 2025
- IBM • Machine Learning Professional Certificate • Oct 2024
- Meta • Back-End Developer Professional Certificate • Jul 2024
- IBM • Full Stack Software Developer • Jul 2024
- University of Michigan • Django for Everybody Specialization • Apr 2024
- Meta • Full Stack Developer: Front-End & Back-End from Scratch Specialization • Jan 2024
- Meta • Front-End Developer Professional Certificate • Jan 2024

BS Software Engineering — University of Management & Technology (UMT), Lahore Nov 2022 – Jun 2026

Relevant coursework: Software Architecture, SE, SRE, SCD, SPM, SQE, AI & ML, Web Engineering, Database Systems
